BREEZE T30

The thermoelectric system is simply an heating pump that performs the same function as compression or absorption refrigerating systems. It transfers the heat form a cold area to a warm area from where it is the dispersed to the surroundings. The main features of a thermoelectric system are:

- Quite operation and no vibration;
- Can operate in any orientation (no need of levelling);
- It is the unique environmentally friendly cooling system;
- Solid state device with no moving parts;
- Small in size and lightweight;
- The energy consumption is much lower than absorption systems.

Technical data

| | |
|-------------------------|---------------------|
| Height | 480 mm |
| Width | 390 mm |
| Depth | 390 mm |
| Product Class | 30 lt |
| Voltage | 220-240V / 50-60 Hz |
| Energy Efficiency Class | A |
| Power | 65 W |
| Technology | Thermoelectric |
| Finishes | Solid Door |
| Lock and key | No |
